EDUCATION

BS Information Technology Major in Network Technology Batangas State University TNEU Alangilan Campus Recognition: Dean's Lister	July 2026 GWA: 1.47
---	-----------------------------------

WORK EXPERIENCE

Software Engineer Intern Center for AI and Smart Technologies - Conducted formal code reviews, applying industry-standard practices (nits, suggestions, blockers) and collaborating through peer programming to resolve issues. - Built automated test scripts for both backend and frontend, mapping manual test cases into repeatable automation and expanding coverage beyond initial requirements. - Performed penetration testing and vulnerability assessments using Kali Linux, OWASP ZAP, Nmap, Nikto, and Burp Suite, including SQL injection, IDOR, and privilege escalation testing. - Assisted in developing and maintaining full-stack web applications across all SDLC phases.	Feb 2026 - May 2026
---	----------------------------

PROJECTS

IoT-Based Rotten Egg Sorting Device (Capstone Project) - Built an IoT edge device using MobileNetV2 on Raspberry Pi for real-time egg quality classification. - Developed a Next.js web dashboard with Node.js and Firebase backend integration. - Reduced manual inspection through embedded machine learning for faster, more accurate quality assurance.
Recruitr - Job Portal System - Developed a role-based recruitment platform using Laravel and PostgreSQL for job applications and interview scheduling. - Built responsive interfaces with Livewire and Tailwind CSS featuring real-time validation and dashboards. - Automated application tracking and hiring workflows to reduce manual recruitment tasks.
Renta Juan - Car Rental System - Developed a full-stack car rental system using React.js and Firebase with complete CRUD functionality. - Designed a responsive interface with real-time database operations for efficient data management. - Integrated React frontend with Firebase backend to deliver a scalable car rental platform.

TRAINING & CERTIFICATIONS

AWS Academy Graduate - Cloud Security Foundation Issued on: December 10, 2025
AWS Academy Graduate - Cloud Foundation Issued on: May 19, 2025
Cisco Networking Academy Program - Network Defense Issued on: May 08, 2025
Cisco Networking Academy Program - IT Customer Support Basic Issued on: May 08, 2025
Cisco Networking Academy Program - Introduction to Cybersecurity Issued on: April 05, 2025

SKILLS

Technical Skills - Networking: TCP/IP, routing & switching, network defense, network troubleshooting - Hardware & Software Troubleshooting: problem isolation, diagnosis, resolution - Security Tools: Kali Linux, Burp Suite, OWASP ZAP, Nmap, Nikto - Programming Language: Python, Javascript, PHP - Cloud Platforms: AWS (Cloud Foundation, Cloud Security Foundation) - Tools & Technologies: Git & Github, AWS Console, REST APIs - Software Development: SDLC (Agile), Monolithic & Microservices Architecture
Soft Skills: - Team Collaboration - Adaptability & Flexibility - Problem Solving & Critical Thinking - Communication & Empathy
